

# Next-Generation CASB Base Professional Services

## Meeting Your Next-Generation CASB Security Assurance Requirements

When deploying new technology, you want to get the most out of your security investment and protect your business. This includes minimizing risk and business disruption as you adopt new capabilities. You must also ensure that your implementation follows best practices to maximize its value. However, you may not have the staff or skills in-house to give you complete confidence that your security investments are protecting your organization.

### Benefits

- Expedited time to value for your security investments
- Accelerated capability adoption adhering to best practices
- Minimized risk through expert planning and risk mitigation at every step
- Confidence in the deployment process with quality execution and day-one protection

Palo Alto Networks Next-Generation Cloud Access Security Broker (CASB) securely enables adoption of SaaS applications. Our multi-mode Next-Gen CASB Bundle Base Service is designed specifically to help you with Next-Gen CASB planning and execution, delivering the highest level of security to protect your software-as-a-service (SaaS) applications. Working with your IT security teams, we help simplify operations by ensuring your Next-Gen CASB service safely enables your SaaS application adoption.

This service provides the expertise to deploy Next-Gen CASB for production, saving your team valuable time and effort. Knowledge and documentation are transferred to your team upon completion of the engagement. The result is a well-planned and accelerated deployment of Next-Gen CASB technology that adheres to best practices for securing your enterprise.

The service covers a base production deployment for SaaS Inline, Inline Data Loss Prevention (DLP), Data Security, and SaaS Security Posture Management (SSPM). We offer Professional Services to enable customers to configure and deploy Next-Gen CASB in their environment. We provide deployment services and flexible options that best fit your needs.

The services' objective, to be agreed upon at project kickoff, is to implement a Palo Alto Networks Next-Gen CASB environment and provide you with the ability to:

- Start securing your SaaS applications usage and data.
- Confidently configure and deploy Next-Gen CASB in your environment.
- Equip your own resources with the necessary knowledge to successfully manage your Next-Gen CASB instance.

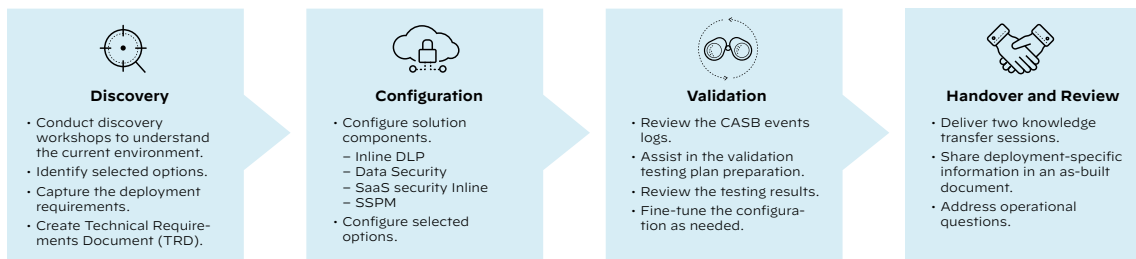

## Outcomes

This engagement will provide you with:

- Project management to guide you from kickoff to wrap-up
- Expedited time to value for your Next-Generation CASB investment
- Day-one protection based on best practices
- Confidence in the deployment process with quality execution
- Public cloud infrastructure based on Palo Alto Networks' reference architecture

## How It Works

We execute our Professional Services with consistency to deliver your desired outcomes, including day-one protection and capability adoption. These services are designed to be delivered remotely, but on-site engagements are available. All services include project management from Palo Alto Networks to free up your team during all steps involved in the service execution.

**Figure 1:** Deliverables provided in accordance with the services description

The services are delivered in four steps:

1. **Discovery:** Palo Alto Networks will conduct discovery workshops to understand the current environment and capture the customer requirements for the deployment in a Technical Requirements Document.
2. **Configuration:** Palo Alto Networks will configure the different components of the solution as per the documented and approved technical requirement. This includes Inline DLP, Data Security, SaaS Security Inline, and SSPM.
3. **Validation:** Once the configuration is complete, Palo Alto Networks will work with you to validate the deployment by reviewing the CASB events logs, assisting in the validation testing plan preparation, reviewing the testing results, and tuning the configuration as needed.
4. **Handover and review:** Once the implementation is complete, we'll deliver two knowledge transfer sessions during which all the deployment-specific information will be shared, and any questions from your team on how to operate the solution will be answered. Additionally, an as-built document will be delivered.

## Next-Gen CASB Base Professional Services Detailed Scope

**Table 1: General Deliverables**

Description	In Scope
Project Kickoff Document	•
Baseline Project Plan with Tasks and Dependencies	•
Technical Requirements Document	•
As-Built Configuration Document	•
Knowledge Transfer – Two (2) Knowledge Transfer Sessions; Up to Four (4) Hours Duration	2

**Table 2: Inline Enterprise DLP**

Description	In Scope
Target Systems – Select from one of the following options:	
• Panorama Managed NGFW	2
• Panorama Managed Prisma Access deployment on (Mobile Users, Explicit Proxy, or Remote Networks)	1
• Cloud Managed Prisma Access deployment on deployment scenario (Mobile Users, Explicit Proxy, or Remote Networks)	1
Predefined Data Filtering Patterns	50
Data Filtering Profiles	1
DLP Security Rules	1
Exact Data Matching (EDM) CLI Tool Installation	1
EDM Dataset	1
Review and Tune Case	1

**Table 3: Data Security Component**

Description	In Scope
Onboard SaaS Applications	1
Create Asset Rules	1
Create User Activity Rules	1
Create Security Control Rules	1
Auto-Remediation Actions	1
Predefined Data Patterns in Data Profiles and Security Policies	50
Customer or Predefined Data Profiles	1
Review and Tune Cases	2

**Table 4: SaaS Security Posture Management**

Description	In Scope
Onboard SaaS Applications	1
Active/Configure Security Rule	1
Review and Tune Cases	1

**Table 5: SaaS Security Inline Parameters**

Description	In Scope
Number of Systems: Configuration and Review – Select from one of the following options ( 1 each): <ul style="list-style-type: none"><li>• Panorama Managed Firewall</li><li>• Standalone Firewall</li><li>• Prisma Access Instance</li></ul>	1
Cortex Data Lake Integration	1
SaaS Applications Review	10

## Ordering
